The report that the President has ordered few. Scholeld to supersede fen. Peater in command of East Tennessee and Kentucky is not correct. The disact truth is that some days tince the President received a letter from Gen. Grant, in which the latter stated that Gen. Foster would be unable from phys-ical disability to retain his present command, and requested either McTheron or Gen. Scho-relable ordered to relieve him. The President and requested either are received or Central Selds be ordered to relieve him. The President therespon simply ordered General Schoffeld to report to General Grant for assignment to such duty as he may deem proper.

Now, few appear to be willing to part with either, although the neoday and is not plainer than the fact, that, without great additional sacrifices, the ermy cannot be custained, and the cause must fiel. The fear of getting killed and wounded threatens to reduce all of us to alwery, and the fear of starvation, added to the inst of gain, may produce a famine in the army if not at home. A little less fright and more common sense—we will not say particulation—may compose these difficulties, and show us a patiway out of the bog into which we have falten.

Make it a question of self-interest at once, and look at it in that way alone. Shall we give a part to our suffering sons in the army, or let the Tankees take all? That is the problem, not over-stated, and not to be evaded. We must meet it now. It will not do to put it off fill next year, or even till next spring. It must be faced right away. Hide your pork, keep back your corn, tell lies about your profits, dodge out of the army, and continue this game for a lew brief mouthe, and the Yankees will eat your corn, your negroes will occupy your house, and you will be a runaway white man in the woods, or a conscript in Lincoln's surny.
